Volunteers Needed to Support Medical Students

On Wednesday, May 3rd, 2017, third year medical students will learn about interviewing individuals with mobility or developmental disabilities. Volunteers are needed to pretend to be patients while medical students pretend to be physicians. The medical students will interview volunteers about medical history only, there will be no physical exam.

Volunteers who have disabilities will meet with several students throughout the afternoon with each interview lasting about 20 minutes. This is a GREAT chance to help these students feel more comfortable caring for patients with disabilities! The experience will begin at 1:00 PM and end around 5:40 PM. For details, contact Ann Robinson at 614-685-6551 or email at robinson.861@osu.edu.
