Transportation Equity Survey

Finding safe, affordable, and appropriate transportation options can be difficult for Ohioans with disabilities. Limited access to transportation prevents people with disabilities from getting to medical appointments, work, school and community events.

The Government Resource Center, with support from the Ohio Developmental Disabilities Council (Ohio DD Council), is surveying Ohioans with disabilities, transportation service providers who serve Ohioans with disabilities, and agencies and advocates for Ohioans with disabilities about transportation experiences and barriers.

The 2021 survey is now open! If you are a person with a disability over the age of 19 or a transportation provider, click below:
